Summary

Recent Computer Engineering graduate seeking an entry-level Data Analyst role. Skilled in SQL, Python, Microsoft Excel, and Power BI, with a strong foundation in data cleaning, exploratory data analysis, visualization, and business problem-solving. Experienced in analyzing real-world datasets, developing interactive dashboards, and generating insights to support data-driven decision-making. Eager to apply analytical skills and continuously learn new technologies in a data-driven organization.

Technical Skills

Languages: Python, SQL
Frameworks/Libraries: Pandas, NumPy, Matplotlib, Seaborn
Tools/BI Software: Power BI, Tableau, Microsoft Excel (Advanced), Git, GitHub
Data Concepts: Data Analysis, Data Visualization, Exploratory Data Analysis (EDA), ETL, Statistical Analysis

Education

KCES's College of Engineering & Management, Jalgaon — Jalgaon, Maharashtra
Bachelor of Technology in Computer Engineering — *June 2022 – June 2026*

Dr. S. T. Gujar Jr. College, Betawad — Betawad, Maharashtra
Higher Secondary Certificate (HSC) — *June 2020 – March 2022*

Projects

Hotel Performance Analysis | *Excel, SQL, Power BI* **[GitHub]**

- **Objective:** Analyzed hotel booking, revenue, room, customer, and cancellation data to identify performance trends and support data-driven operational decisions.
- **Cleaned and prepared** hotel booking data using **Microsoft Excel** by identifying duplicate records, standardizing data, and preparing datasets for analysis.
- **Analyzed** booking trends, revenue, room performance, and cancellation patterns using **SQL** to identify key business insights.
- **Built** an interactive **Power BI dashboard** with KPIs, slicers, trend analysis, and comparative visuals to analyze room types, customer cities, and booking channels and present actionable insights.

E-commerce Sales Dashboard | *Power BI, Excel, DAX, Power Query* **[GitHub]**

- **Objective:** Analyzed e-commerce sales, purchase costs, and profit across product categories, customer segments, regions, and payment methods to identify business trends.
- **Designed** an interactive **Power BI dashboard** with KPI cards for Total Sales, Total Purchase Cost, and Total Profit, along with slicers for Gender, Region, Product Category, and Payment Method.
- **Transformed and cleaned** data using **Power Query** and created **DAX measures** for KPI calculations and business metrics.
- **Developed** bar and line charts to analyze product-wise sales, profit trends, regional performance, and payment method preferences.

Certifications

Python 3.4.3 Training Certification | *Spoken Tutorial, IIT Bombay*

- Successfully cleared the remote online examination conducted by IIT Bombay with a score of **90.00%** and earned 4 credits.

Python Programming Certification | *CoDing Seekho (ISO Certified)*

- Completed training covering Python programming fundamentals, core concepts, syntax, and problem-solving.
